

sectional views illustrating a method for fabricating a magneto-resistance effect head according to a fifth embodiment of the present invention. In addition, the subject matter shown in Figures 35 and 36 is discussed in detail on page 48 of the application at lines 4-22. Therefore, specific support for the subject matter shown arises from the patent specification text. Finally, Figures 35 and 36 are part of a series of Figures (Figures 34-37) for a fifth embodiment of the invention. Each of the materials shown in Figures 35 and 36 can be found in Figures 34 and 37 originally filed with the application and, in addition, Figures 18-20 of the originally filed application show photoresists 22 and 23. As such, no new matter is presented in the application by inclusion of Figures 35 and 36.
